Introduction

In compliance with the basic objectives of the Cooperation Council for the Arab States of the Gulf, and in conformity with the objectives of the GCC Unified Economic Convention seeking to achieve economic integration among GCC member states, and aware of the crucial role played by GCC industries in the economies of the GCC member states, it becomes vital for the member states to take necessary measures against dumping, subsidy and increase of imports, which cause injury, threat of injury, or retardation to GCC industries.

Pursuant to Article 86 of the Rules of Implementation of the GCC Common Law on Antidumping, Countervailing Measures and Safeguard Measures which states, "The Technical Secretariat issues an Official Gazette where it publishes all publications required under this Common Law and its Rules of Implementation". Hereby, GCC-Bureau of Technical Secretariat for Anti Injurious Practices in International Trade pleased to publish the Notice Volume No (31) of the Official Gazette of GCC- Bureau of Technical Secretariat for Anti-Injurious Practices in International Trade.

According to current circumstances of the Corona pandemic (COVID 19), GCC-TSAIP will not issue a paper version of this Official Gazette.

**Initiation Of anti-Dumping Investigation Against GCC Imports
Of Electric Accumulators Used For Starting Piston Engines,
From 32 to 225 Amperes.
Originating in or exported from Spain, Turkey, and India**

In conformity with the GCC Common Law on Anti-Dumping, Countervailing and Safeguard Measures and its Rules of Implementation, (hereinafter referred to as the Regulation), and upon the decision no. (39/AD9/2021) of the Permanent Committee of Anti Injurious practices in the International Trade (hereinafter referred to as the Permanent Committee) regarding accepting the anti-dumping complaint lodged by the GCC industry and approving the initiation of the anti-dumping investigation, the GCC- Bureau of Technical Secretariat for Anti-Injurious Practice in International Trade (hereinafter referred to as the GCC-TSAIP) announces the initiation of anti-dumping investigation concerning imports of electric accumulators including separators, whether or not rectangular (including square) lead acid of kind used for starting piston engines, from 32 to 225 amperes (the product under investigation) Originating in or Exported from Spain, Turkey and India, from the date of the publication of this notice in the Official Gazette of the Bureau of the Technical Secretariat for the Injurious Practices in International Trade (hereinafter referred to as Official Gazette) according to the following:

1. Complaint

The GCC-TSAIP received a properly documented complaint submitted by the National Batteries Co. Ltd (hereinafter referred to as “The Complainant”) on behalf of the GCC industry according to the provisions of Article (2) of the Regulation, alleging that the imports of the product under investigation are being imported from Spain, Turkey, and India into the GCC market at dumped prices and are thereby causing material injury to the GCC industry of the like product.

2. GCC Industry

The Complainant is the National Batteries Co. Ltd., The complaint was supported by The Reem Batteries & Power Appliances Co. SAOC from Sultanate of Oman. The complainant with supporter represent 45% of the GCC total production of the like product. Therefore, the complainant represents the GCC industry in accordance with Article (6-1) of the Regulation.

3. Product under Investigation and GCC Like Product

Electric Accumulators Including Separators, Whether or Not Rectangular (Including Square) Lead Acid of Kind Used for Starting Piston Engines, from 32 to 225 amperes. The product under investigation is classified under the following GCC-Unified Tariff Code from item: (85071000), originating in or exported from Spain, Turkey and India.

The product under investigation is used to start-up the engines of cars, trucks, vehicles, etc.

The complainant clarified that the GCC like product has identical characteristics to those of the product under investigation in respect of the physical characteristics, production process, end uses, sales and distribution channels, customs classification, and substitutability.

4. Allegation of Dumping

The Complainant based its allegation of the existence of dumping on a comparison between the export prices and constructed export prices of the product under investigation with the normal value in the domestic market of the concerned countries at the same level of trade. This comparison resulted in the

existence of dumping margin higher than 2% of the export price and thus could not be ignored.

5. Allegation of Injury

The Complainant alleged that there has been a significant increase in the volume of the allegedly dumped imports of the product under investigation from Spain, Turkey, and India, exceeding, in absolute terms and relative to the domestic production, 3% of the total GCC imports of the product under investigation, which caused material injury to the GCC industry that was represented in the following factors:

- There is a price undercutting between the GCC like product and the product under investigation,
- Decline in sales volume,
- Decline in production volume and capacity utilization,
- Decline in labour, wages and productivity,
- Increase of inventory,
- Inability to grow or raise capital.

6. Procedures

The GCC-TSAIP examined the accuracy and adequacy of the data contained in the complaint and prepared the initiation report that has been submitted to the Permanent Committee according to Article 3 of the Regulation, which in turn approved the initiation of the investigation and the publication of the notice of initiation in the Official Gazette according to Article 4 of the Regulation as they are satisfied that the information, data, evidence, and facts reported in the complaint appear to be sufficient to justify the initiation as per the provisions of the Common Law and its Rules of Implementation. Therefore, according to Article 9 of the Regulation, the notice of initiation is published in this Official Gazette while its publishing date is considered to be the effective date for the initiation of this investigation. Furthermore, the Embassies of the concerned countries in the country of headquarters were notified after receiving the complaint and before proceeding to initiate the investigation according to Article (7-1) of the Regulation.

7. Investigation Period

The dumping investigation period is from 1st January 2020 to 31st December 2020.

The injury investigation period covers the period from 1st January 2017 to 31st December 2020.

According to Article 23 of the Regulation, the investigation shall be completed within 12 months from its date of initiation. This period may be extended in special circumstances for no more than (6) months.
