Part I Definitions and Requirements

I. Questionnaire Notes

This questionnaire was formulated by the Ministry of Commerce of the People's Republic of China in accordance with the provisions of the Anti-Dumping Regulations of the People's Republic of China for the purpose of investigating and adjudicating whether the anti-dumping measures applicable to imports of phenol originating in the United States, the European Union, South Korea, Japan and Thailand may lead to continued or recurrence of dumping and damage.

This case was investigated for imports of phenol originating in the United States, the European Union, Korea, Japan and Thailand. The scope of the review investigation product is the product applicable to the original anti-dumping measures, consistent with the product scope in the Ministry of Commerce's Announcement No.37 of 2019, which is attributed to the Customs Import and Export Tax of the People's Republic of China: The 29071110.

II. Responsibility to Specific Requests

Ask your company to respond to the following requirements:

1 ...Any interested party participating in the survey shall truthfully answer this questionnaire and accept the relevant verification and shall not make false statements. If it refuses to provide information, or fails to reflect the situation, or cannot fill out this questionnaire and submit the relevant material in the requested form or manner within the time specified by the Ministry of Commerce, or the information provided is incomplete and incorrect, which results in the relevant information cannot be used, or the information provided cannot be verified, or otherwise seriously obstructed the investigation, the Ministry of Commerce may make an industrial damage ruling on the basis of existing or other available information. A decision made in accordance with the above law may be detrimental to your company.

2 The Ministry of Commerce will give full consideration to the legitimate right of stakeholders to keep the particular information submitted confidentially, while the Ministry of Commerce protects the right and interests of interested parties to know the relevant information in accordance with the law. Any information that is inherently confidential (e.g., as a result of the disclosure of the information will lead to the substantial profit of other competitors or seriously adversely affect the provider or source of the information) or the stakeholder's request to be treated as confidential, such information shall be kept confidential by the Ministry of **Commerce**, which shall not be disclosed without the specific permission of the provider. Stakeholders shall provide confidential information in writing the reasons for the application for confidentiality

and, in the same time, provide a non-confidential summary of such information.

For the information requested for confidential processing in the answer, the public version shall state the confidentiality on a case-by-case basis and provide a non-confidential summary of the confidential information, which will be made public and accessible to other stakeholders. Non-confidential summaries should be sufficiently detailed to ensure that other stakeholders can rationalize the substance of the confidential information.

In exceptional circumstances, and with the consent of the Ministry of Commerce, the interested party may refrain from submitting a non-confidential summary of specific confidential information, but must still submit a reasonable and sufficient written statement stating, item by item, the reasons why the confidential information cannot be summarized.

Methods for providing non-confidential summaries include, but are not limited to, indexing data or indicating data intervals, summarizing and generalizing textual information.

The Ministry of Commerce will review non-confidential summaries provided by stakeholders, who may comment on non-confidential summaries. If it fails to reasonably reflect the substance of the confidential information or lacks a reasonable and sufficient reason for not being able to summarize, the Ministry of Commerce will inform the interested party of the deadline to correct it once.

If the Ministry of Commerce considers that the stakeholder's application for confidentiality is not justified and the interested party is unwilling to disclose information or authorize disclosure of information in summary form, the Ministry of Commerce may refrain from using such information at

the time of its ruling.

3 In accordance with the above principles, the questionnaire should be submitted in a confidential and public version at the same time. The confidential version should be a complete answer containing all information, including confidential information; The public version should be a non-confidential summary of public information and confidential information. The public version and the confidential version should be indicated on the first page of the answer. The part of the public version answer that does not apply for confidential processing should be fully consistent with the corresponding part of the confidential version.

4 In response, a separate paper note may be provided as part of the answer to the questionnaire if certain items are not fully described. The contents of the paper note should clearly indicate the number of specific questions corresponding to the questionnaire.

The answer must be completed in printed simplified Chinese and cannot be translated into Chinese in special text. Both versions of the written replies should be provided with an original version, all of which should be properly bound and marked in sequentially on the body of the reply and the notes.

For written answers provided by your company, please provide CD-ROMs made in **PDF** and **WPS** versions, respectively, or other computer carriers acceptable to the Trade Relief Bureau of the Department of Commerce. All tables should be provided in **PDF** versions and **WPS** tables, respectively. The signature page needs to be scanned for the **PDF** version. In addition, the original file is not editable, such as: Proof of transaction documents such

as invoices, bills of lading, etc., submit only **PDF** files. The contents of the CD-ROM should be consistent with the format in the responses. **Two** CD-ROMs should be provided.

The Ministry of Commerce has the right to further collect information and information relating to this investigation by issuing additional questionnaires or other means.

5 The responses must be in simplified printed form in Chinese. The Trade Relief Bureau of the Ministry of Commerce only accepts evidence and materials provided in Chinese form. If the original is foreign, the Chinese translation (translated according to the original foreign language) should be provided with the original foreign language or a copy of the foreign language.

6 Questions should be read carefully before **answering** them. In answering questions, the subject of the question should first be listed and then answered directly under the topic. If this issue does not apply to your company, please state clearly that "this issue does not apply to the Company" and explain the reasons.

7 Ask your company to answer all the questions in this questionnaire in accordance with the scope of the product under investigation as set out in the bulletin of this case. If your company has an objection to the scope of the product, it shall provide a description and provide detailed evidence in Part II of this questionnaire, "Products under investigation".

8 Please indicate the source and specific origin of the information and materials provided by your company in the reply, and provide a copy of that source and origin. If you originate from the website, please provide a screenshot of the site.

9 Ask your company to report according to the metrics and currency names required in the questionnaire, such as the metrics used in the responses, currency names and questionnaire requirements, please provide reasons and provide conversion criteria.

10 Your company shall provide sales documents, financial statements, accounting records and other documents, such as contracts relating to the answer, as required by the questionnaire. Your company should preserve and organize all evidence and materials supporting the information provided in the questionnaire for verification.

11 When filling out the relevant forms in this questionnaire, if calculations are involved, your company should retain the formula in the form provided. If the formula for calculation is not retained, it is considered incomplete.

12 The answer of your company should be submitted through the Practical Lawyer of the People's Republic of China and be handled by an attorney acting on related matters. Please provide a valid letter of attorney's authority and a copy of the lawyer's valid practising certificate.

13 Please, on **November 15, 2024, 17:00** (Beijing time) previously sent or sent directly to the address listed on the front page of this questionnaire, and electronic responses should be submitted in **PDF** and **WPS** versions, respectively, via the Trade Relief Survey Information Platform (<https://etrb.mofcom.gov.cn>). The Trade Relief Investigation Bureau of the Ministry of Commerce took the date of submission of the electronic version of the responses submitted by the "Trade Relief Investigation Informatization Platform".

14 **The** period during which information is not specified in this questionnaire should be understood from **1January2020** to **31March2024**.

15 **Request** your company to fully reserve the working draft and relevant documents to answer this questionnaire for verification by the Ministry of Commerce on the ground.

16 If the circumstances and evidence related to the answer of **your** company change, the Ministry of Commerce should promptly notify the Ministry of Commerce and supplement the relevant materials, otherwise the Ministry of Commerce will not bear the consequences.

Definitions Relevant to this Questionnaire

1 **Productsunder investigation:**Refers to the imported products identified by the investigative organ in this case under the final review investigation of the anti-dumping period.

2 **Similarproducts:**The product produced by a foreign manufacturer is the same as the product being investigated, or if the same product does not exist, it is the most similar product in terms of characteristics.

3 **Similarproducts inChina:**China produces the same product as the product under investigation, or if the same product does not exist, it is the most similar product in terms of characteristics.

4 **...Associated parties:**Both shall be considered as related parties in the following cases:(1) one party directly or indirectly controls the other;(2) The two parties are directly or indirectly controlled by a third party;(3) Both parties directly or indirectly control a third party and have reason to believe that the existence of this joint control relationship

causes them to act differently from those who have no relationship. If one party is in a position to restrict or direct the other party by law or through the battalion, the former shall be deemed to control the latter.

5 Deadline for replies: The final date of service to the Ministry of Commerce.

6 ...Period of investigation: The period of the final review of industrial damage investigation, usually three to five years before the start of the investigation (in order to compare the industry changes before and after the implementation of anti-dumping measures, the investigation organ may request the enterprise to provide data information for the year prior to the investigation period).

7 Industrial Damage Investigation Period: January 1, 2020 to March 31, 2024.

Part II Basics of Company

Your company responds to this section of the contact.

In the department. The job. It's a phone.

1. Has your company produced products that are the same or similar to the product being investigated during the survey period?

No (please sign in a statement and send this page and statement immediately back to the Ministry of Commerce)

() Is (please read the instructions carefully, sign in the affirmation, complete all questionnaires, send all the answers back to the Ministry of Commerce)

2. During the investigation period, did your company import the products under investigation?

No to ()

Yes ()-Please contact the Trade Relief Investigation Bureau of the Ministry of Commerce as soon as possible to receive a Chinese importer questionnaire or log in to the substation of the Trade Relief Bureau of the Ministry of Commerce and China Trade Relief Information Network download questionnaire.

Part III Similar Products

Your company responds to this section of the contact.

In the department.

The job.

It's a phone.

16. Provide descriptions of similar products produced by your company, including names, physical and chemical characteristics, uses, consumer evaluations, national standards, industry standards, etc., as well as product descriptions or brochures.

17. Please explain the differences between the production and sales of similar products and before the survey period during the survey period, mainly the differences in the physical and chemical properties of the product itself, product design, production process and marketing.

18. Please outline whether the product characteristics (including physical and chemical characteristics, product appearance, packaging), product quality, use (including the materials and production devices, processes used), sales conditions and channels, product specifications or model range, transportation conditions, consumer perception, etc., are the same product characteristics (including materials and production devices, processes) produced by your company and imported products. Please explain one by one.

19. Please explain the production equipment, installation and production process of your company's similar products during the survey period (please attach the production flow chart).

20. Please describe the main raw materials, fuels and power names for the

production of similar products and provide their respective unit quotas and actual consumption indicators in accordance with the table below.

The Mate Name of Name	The Year 2020		The 2021		2022		2023		2023 January -		The year 2024	
	unit Quotas per actual	It's actual	Quotas per actual	It's actual	Quotas per actual	It's actual	Quotas per actual	It's actual	unit Quotas per actual	It's actual	unit Quotas per actual	It's actual

21. (1) During the investigation period, whether your company has occurred in connection with the production of similar products

Opening of new factories, relocation, expansion, acquisition, merger or closure?

No to ()

Is ()-provides the time, cause, condition and impact on the production of similar products.

(2) During the survey period, has your company made major technological progress or innovation in the production of similar products?

No to ()

Yes-please elaborate.

(3) During the survey period, does your company's production process and technical equipment level have advantages in China's peers? Is there a gap compared to the international advanced technology level?

The Nothing ()

There is ()-please elaborate.

22. Please explain whether the sales channels of your company's similar products are the same or similar compared to imported products under

investigation?What are the specific sales channels?

23. Please explain, during the survey period, what are the geographic areas where similar products of your company are sold in China?Is there a significant difference in the geographical range of sales compared to imports of products under investigation?If so, please indicate.

24. Please explain that during the investigation period, the sale of similar products of your company in China has obvious time distribution characteristics?Whether it is sold in the Chinese market at the same time or approximately as compared to imports of products under investigation.

25. What are the main reasons why your company's customers usually consider when considering purchasing this product?Is the price the most important factor in determining the purchase of the products under investigation from different sources, or the purchase of domestically produced products?If there are other factors, please list in order of importance from strong to weak, and briefly state it.

Part IV Operational and Related Information

Your company responds to this section of the contact.

In the department. The job. It's a phone.

26. Has your company (for example, in the company's internal plan) discussed, predicted or even formulated a corresponding adjustment plan for the operation and organization of the company following the abolition of anti-dumping duties? If so, please provide a brief summary of the above discussions and provide written material relevant to the above discussion.

27. Please indicate whether the production capacity and output of your company's similar products during the survey period compared to the previous year of the survey period has recovered? Are there plans to continue to increase production capacity in China or abroad? If anti-dumping measures were eliminated, would the capacity increase plan be materially affected? Please attach the written documentation to this questionnaire.

28. During the survey period, while your company produces similar products, does it also produce other products?

No to ()

Yes ()-Please provide indicators for similar products as a proportion of total product indicators.

During the period	Production of%	Sales by%	Production costs (or	Cost of Sales%	Sales Revenue%	Gross sales
In 2020						
In 2021						
In 2022						

In 2023						
January-March 2023						
January-March 2024						

Note to: The proportion should be retained after four decimal points, such as 12.3456%.

Gross Sales = Sales Revenue - Cost of Sales

(1) The proportion of output (%) = production of similar products / enterprise production of all product output (including similar products) × 100% (2) production of similar products = the same product output in Title 50.

(2) (1) The proportion of sales (%) = sales of similar products / the total number of products sold by enterprises (including similar products) × 100% (2) sales of similar products = "total sales volume" in Title 51.

The total number of products sold by enterprises shall include two parts of domestic sales and exports, which contain the amount of domestic sales and exports of similar products.

(3) (1) The proportion of production cost (or manufacturing cost) (%) = the production cost of similar products / Enterprise production of all products (including similar products) × 100%

The production cost (or manufacturing cost) of similar products here refers to the production cost (or manufacturing cost) of the finished product; The production cost of all products (including similar products) refers to the production cost of finished or unfinished products.

(2) The production cost of similar products (or manufacturing costs) = "unit production costs" in Title 56.

(4) (1) Proportion of sales revenue (%) = similar product sales revenue / All revenue from enterprise sales products (including similar products) × 100%.

(2) Revenue from the sale of similar products = "total sales revenue" in Title 53;

The company's entire product sales revenue (including similar products) shall be equal to the "main business income" in the audited profit statement.

(5) (1) The proportion of gross profit on sales = gross profit on the sale of similar products / Total gross profit of enterprise sales products (including similar products) × 100%.

(2) Gross profit on the sale of similar products = revenue from the sale of similar products - cost of sales of similar products.

(3) Revenue from the sale of similar products = "total sales revenue" in Title 53.

(4) The cost of sales of similar products = "cost of product sales" in Title 60.

(5) All gross profit of the company's sales of products (including similar products) = the sum of sales of all product revenue - the sum of all products sold.

The sum of sales of all product revenue shall be equal to the "main business income" in the profit statement, which should contain export sales revenue.

The sum of the total cost of selling the product shall be equal to the "main business cost" in the profit statement, which should include the cost of export sales.

29. During the survey period, did the equipment and installations used by your company to produce similar products produce other products?

No to ()

Is ()-Fill data on the distribution of production capacity for similar products and other products. In addition, please provide information on whether this use will continue into a predictable future (e.g., anti-dumping duties are taken)

After it's gone)

The indicators The name \	Total Product of	Production capacity of		Production capacity of other		Spare capacity capacity	
		The number of	The Percent	The number of	The Percenta	The number of	The Percentag
	Ahh, ah.	Ahh, ah.	It's .	Um, huh?	It's ah	\= ~ ~	It's ah
In 2020							
In 2021							
In 2022							
In 2023							
January-March 2023							
January-March 2024							

Note to: If there are many types of products, the number of columns is not enough to be accompanied by a separate table.

If there is no data on production capacity allocation for products (including similar products), please fill out a variety of products (including similar products)

The actual production of the product and the proportion of the actual production of all products produced by the equipment and installations shall be apportioned in this proportion.

30. (1) Does your company directly engaged in the production of similar products produce other products?

No to ()

Yes-Complete data on personnel and salary distribution for each product (including similar products).

The unit: People, Dollars

Name of product	Factory (or		Category: Same					
	Total Salary of	Number of	The Shared	Total Salary	Number of	The Shared	Total Salary	Number of
During the In 2020								
In 2021								
In 2022								
In 2023								

January-March 2023								
January-March 2024								

Note to: The number of employees is the corresponding data on the number of employees of your company directly engaged in the production of similar products. Among them, the proportion of this kind of product accounts for the proportion of all product output (including similar products) in the production plant or workshop. The total salary shall be the total salary corresponding to the number of employees in this category. If the enterprise believes that the assessment method is unreasonable, it may choose other reasonable assessment methods according to the actual situation of the enterprise, but the reasons for the assessment shall be stated.

(2) Is it possible for the above-mentioned employees to produce other products in the foreseeable time? How much could this transfer of labor be?

31. (1) The average production capacity and start rate of your company's similar products during the period.

The unit: Tons of tons

During the	Production of	Average production capacity	Start rate
In 2020			
In 2021			
In 2022			
In 2023			
January-March 2023			
January-March 2024			

Note to: Operating rate = production/average production capacity × 100%

The average production capacity during the period is the sum of the monthly design capacity of equipment that has been put into production during the period, and the new production capacity is counted in the month of commissioning;

Equipment monthly design production capacity = equipment design production capacity/12. (Start rate can also be expressed according to the starting time, etc.)

(2) If there is a situation where the capacity utilization rate is lower than normal, please explain why. If you take anti-dumping duties, how will it affect the start-up rate of similar products in your company?

32. Changes in wages and employment changes for all employees in your company.

During the period	Total salary (dollar)	Total Number of Employees	Per capita wage (dollar/pers	年平均工作时间 (千小时/人)	Number of Employment	Rate of employment change
In 2020						
In 2021						

In 2022						
In 2023						
January-March 2023						
January-March 2024						

Note to:(1) "total number of employees":Refers to the annual average of the total number of persons registered in the company corresponding to the total salary, but does not include expatriate or retirees;If the enterprise pays to non-listed personnel, the "total number of employees" shall include this part of the personnel;If the enterprise does not pay salaries to non-listed personnel, the "total number of employees" should not include this part of the staff.

Total number of employees = (number of employees at the beginning of the year + total number of employees at the end of the year)/2

(2) "Total Salary":The total salary corresponding to the total number of employees in this question;

(3) "wage per capita":= Total salary/total number of employees;

(4) "Employed Number":Corresponding to the topic "total number of employees", but does not include non-listed personnel;

(5) "The rate of change in employment":Refers to the changes in the number of employed persons in the current year and the number of employed in the previous year, the rate of change in employment = (the number of employees in the previous year - number of employed in the previous year) / last year × 100%.

33. Changes in wages and employment changes for employees who produce similar products.

During the period	Total salary Amount	Total Number of Employees	Per capita wage	Average working hours per year	Number of Employees	Rate of change in employment
	Ahh, ah.	Ahh, ah.	3)=1-2	Um, huh?	It's ah	It's ah
In 2020						
In 2021						
In 2022						
In 2023						
January-March 2023						
January-March 2024						

Note to: Total number of employees in this question = (number of employees at the beginning of the year + total number of employees at the end of the year)/2;

"Total Number of Employees":Refers to the total number of employees associated with similar products, including similar product manufacturers (or workshops) personnel and related auxiliary personnel and management

personnel.If the same product production plant (or workshop) produces other products at the same time, the number of workers in the same product production plant (or workshop) is the number of employees of the same product in Title 30;The number of auxiliary personnel and the number of managers refers to the auxiliary personnel and management personnel other than the production plant (or workshop), calculated according to the proportion of similar product sales income in Title 28 (the denominator shall not contain personnel data from auxiliary departments and management departments not related to similar products).

"Total salary":The total salary corresponding to the total number of employees in this question;

"Wage per capita":= Total salary/total number of employees;

Number of employed persons:Corresponding to the topic "total number of employees", but does not include non-listed personnel;

The rate of change in employment:Referring to the changes in the number of employed persons in the current year and the number of employed in the previous year, the rate of change in employment = (employment in the current year - number of employment in the previous year) / previous year employment × 100%.

34. If anti-dumping measures are eliminated, what will affect the employment and per capita wage level of your company's employees who produce similar products?Please elaborate.

35. (1)The labor productivity of your company producing similar products.

Unit:tonnage

During the period	Production of	Total Number of Employees	Productivity of Labour
	Ahh, ah.	Ahh, ah.	3)=1-2
In 2020			
In 2021			
In 2022			
In 2023			
January-March 2023			
January-March 2024			

Note to: "Total Number of Employees" = "Total Number of Employees" in Title 33;
Labor productivity = annual output/total number of employees.

(2)If there is a change in productivity, please specify the reasons for

the change.

36. Did your company and affiliates have any of the following transactions related to the products or similar products being investigated during the survey period?

(1) the procurement and sale of raw materials, main materials, fuel, power required for production;

The Nothing ()

Yes-please provide the number, unit price, amount, amount of transactions per year during the survey period, as shown in the table below. The amount below (higher) market price and indicates the relationship and the associated transaction process.

January-March 2024			

Note: Total Sales Revenue = China Sales Revenue + Export Sales Revenue.

If there is a return of sales, sales discounts must reduce the sales revenue of the current period.

54. Please fill in the Chinese sales price of your company's similar products. Such as dividing the model,

Please fill out according to different product models.

The unit: Dollar/ton

During the period	Minimum Selling	The Highest Sales Price	China Sales Price (excluding VAT)	Factory price (excluding freight,
In 2020				
In 2021				
In 2022				
In 2023				
January-March 2023				
January-March 2024				

Note to: The Chinese sales price in this question refers to the weighted average selling price without VAT in Chinese sales of similar products.

Do not correspond to China's sales volume and Chinese sales revenue in Titles 51 and 53.

Among them: $\text{Weighted Average Sales Price} = \text{Chinese Sales Revenue} / \text{Sales in China}$

China Sales Revenue = "China Sales Revenue" in Title 53;

Sales in China = "China Sales" in Title 51;

(1) Describe how the price of your company's sale of similar products is determined (e.g. through easy negotiation, pricing list, etc.). Whether your company distinguishes between distributors and end users to adopt different pricing policies, if any, please elaborate. If your company issues a price list, please include a copy of the price list for the year preceding the survey period and the years during the survey period.

(2) Please indicate the sales commercial discount (e.g. 5%, 10%, etc.) of your company's similar products when they are sold on the price list.

(3) What is your company's cash discount in order to encourage customers to return the payment as soon as possible?

(E.g. 2/10, n/30, etc.: The payment period is 30 days, and within 10 days, customers can receive a 2% discount on the price, such as paying customers within 30 days to pay in full)

(4) Does your company have a price reduction situation during the investigation period?

No to ()

Yes ()-Please provide price declines and calculation methods during the survey period, and please provide as much information as possible, such as documentation on loss of revenue, including copies of documents such as sales contracts, invoices, customer letters, meeting minutes, etc., before and after modifications.

Name of Client

Date of initial offer

Number of involved

Quotes and reasons for which you were initially rejected (excluding shipping prices)

The offer you finally accept (excluding freight)

(5) What factors do your company think affect the price change of your company's similar products?

55. If the anti-dumping duty is abolished, what is the trend of changing the sales price of your company's similar products in China?Please elaborate.

56. During the survey period, the cost of similar products of your company.

The unit: Dollar/ton

	Unit Direct Contact	Unit Direct	Unit fuel and power	Unit Costs	Unit cost of production
	1	Ahh, ah.	It's . . .	Um, huh?	§ = 1-2 + + + +
In 2020					
In 2021					
In 2022					
In 2023					
January-March 2023					
January-March 2024					

Note to: If the above data are presented directly on the book of the enterprise, please fill it out according to the number of books; If it is not directly listed, please calculate the column according to the following formula.

(1) The unit production cost of similar products refers to the total unit production cost of the same product completion product, not included in the products and homemade semi-finished products, and is not related to the internal and export of similar products;

(2) unit production cost = unit direct material + unit direct labor + unit fuel and power + unit manufacturing cost;

Direct material per quarter = total direct material consumed in the production of the same product completed in the quarter/production of similar products completed in the quarter;

Product direct material per year = the total amount of direct materials consumed to produce similar products in that year/production of similar products completed in that year;

(Subject to class).

(1) Please explain the carry-over method of the unit sales cost of similar products of your company (such as first-in, first-out, then in, first-out method, weighted average method at the end of the month, etc.).

(2) During the investigation period *and the year before the*

investigation period, whether the carry-over method used by your company

It's consistent?

Yes is ()

No ()-Please explain the reasons and the resulting impact on the profits of the business.

(3) Please explain the calculation method of the unit production cost of similar products (such as variety method, batch method, step-by-step method, etc.);During the survey period and the year prior to the investigation period, whether the calculation method used by your company is consistent, if inconsistent, please indicate the reasons and its impact.

57. During the survey period, your company's similar products sales tax and additional information.

The unit: The Dollar

During the period	Company Principal	Similar Products	The Shared Proportion	Company's main business Taxes	Similar products should be
	Ahh, ah.	Ahh, ah.	3) = ~/	Um, huh?	¶ = \x
In 2020					
In 2021					
In 2022					
In 2023					
January-March 2023					
January-March 2024					

Note to: Share = Revenue from the sale of similar products / Company's main operating income

Similar products should be amortized sales tax and additional = the company's main business tax and additional proportion

If your company's sales tax on similar products is listed separately on the book, please fill the data directly into the same product.

There is no need for the above-mentioned assessment in the sales tax and the additional "column" column. If not listed separately, please apportion the sales tax on your company's similar products as required by the above form.

58. The cost of your company for three periods.

The unit: The Dollar

During the period	Costs of operation	Costs of administration (Including R&D	C. Financial costs	Total of
In 2020				
In 2021				
In 2022				
In 2023				

January-March 2023				
--------------------	--	--	--	--

January-March 2024				
--------------------	--	--	--	--

Note to: The "operating costs", "administration expenses" and "financial costs" in the above table shall be equal to "operating expenses", "administration costs + R&D costs, etc.", "financial costs", "financial costs" in the audited profit statement.

59. The costs of your company's similar products are shared over three periods (operating costs, administrative expenses (including R&D costs, etc.)), and financial costs.

The unit: The Dollar

During the period	Proportion of assessments	Company's Period Costs Total of	Period of share of similar products Cost of intermittent
In 2020			
In 2021			
In 2022			
In 2023			
January-March 2023			
January-March 2024			

Note to: The share is equal to the proportion of sales revenue in question 28.

(2) Period costs to be shared for similar products = total company-period expenses × share ratio.

60. Your company's pre-tax profits for similar products.

The unit: The Dollar

During the period	Sales of products Sales of Revenue	Sales of products Cost of sale	Products should be sold The sales tax.	The cost of the product	Before the Product Tax It's a profit.
-------------------	---------------------------------------	-----------------------------------	---	-------------------------	--

In 2020					
In 2021					
In 2022					
In 2023					
January-March 2023					
January-March 2024					

Note to: "Product Profit" = Product Sales Revenue - Cost of Sale of Products - Sales Taxes and Additions on Products Costs of the period.

"Product Sales Revenue" = "Total Sales Revenue" in Title 53;

"Cost of product sales" refers to the cost of sales corresponding to "product sales revenue".

"The sales tax and attachment of the product shall be amortized" = "same products shall be amortized sales tax and additional" in Title 57; "Period expenses for the product to be assessed" = "Period expenses for similar products" under heading 59.

The rate of return on investment of your company's similar products.

The unit: The Dollar

During the period	Average amount of investment	Pre-tax profits	Rate of return on investment (%)
	Ahh, ah.	Ahh, ah.	3) = $\frac{\sim}{\sim} \times 100$
In 2020			
In 2021			
In 2022			
In 2023			
January-March 2023			
January-March 2024			

Note to: The amount of investment is the value of all assets invested in the production of similar products. All assets invested in the production of similar products

The value is not presented separately on the book, so it should be distributed according to a certain method:

Average investment in the production of similar products = average total assets \times share ratio; Average total assets = (total assets at the beginning of the balance sheet + total balance sheet year-end assets)/2; Share = proportion of production costs in 28;

2. "Pre-tax profit" = "Product pre-tax profit" in Title 60;

3. Return on investment = pre-tax profit/average investment × 100%.

62. Please follow the table below to fill out the relevant indicators of the cash flow activities of your company's similar products, and please provide a copy of the cash flow statement. If the cash flow statement reflects significant changes in operating activities during the survey period, please provide a detailed explanation of why.

The unit: The Dollar

	The Year 2020	The 2021	2022	2023	January - March 2023	January - March
Total cash inflows						
Proportion of assessments ¹						
Cash inflows allocated to similar products						
Total cash outflows						
Proportion of assessments ²						
Cash outflows of similar products						
Net cash flow allocated for similar products						

Note to: Cash inflows, cash outflows are cash inflows and outflows from cash flows, excluding investment and financing activities.

"Net cash flow" = "cash inflow" - "cash outflow".

If your company's products operate only a single similar product, then "net cash flow distributed by similar products" = "net cash flow"; If your company is a multi-variety product operation, the cash flow of similar products operating activities is not single on the book, the "net cash flow distribution of similar products" in this questionnaire is calculated according to the following methods:

Net Cash Flow Distribution of Similar Products = Cash Inflows Distributed by Similar Products -
Cash Outflows Distributed by Similar Products

Cash inflows distributed for similar products = cash inflows × share 1

Share 1 = proportion of sales revenue in question 28

Cash outflows distributed for similar products = cash outflow × share 2

Share 2 = Proportion of production costs in Title 28

63. Does your company believe that eliminating anti-dumping measures would result in similar products from your company?

Does the business have a significant impact?

Part VI Information on the export capacity of the respondent

Your company responds to this section of the contact.

In the department. The job. It's a phone.

64. Please fill out what you know about the country (region) or the company being surveyed for the production capacity of the product, its future capacity increase or decrease plan, and indicate the source of the data.

Country (Region)/Business Name	Current production capacity	Planned capacity increases and decreases

65. Please fill in the surveyed country (region) or of the surveyed enterprise.

The following circumstances of the product. Also explain the source of the data.

During the period	Country (Region) /Business Name	Production of production	End of Period Stocks	The Exit	
				Total of total	Among them: Exports to China

In 2020					
In 2021					
In 2022					
In 2023					
January-March 2023					
During the period	Country (Region)	Production of production	End of Period Stocks	The Exit	
	/Business Name			Total of total	Among them: Exports to China
January-March 2024					

66. Please fill in the surveyed country (region) or of the surveyed enterprise.

Cases where goods are hindered by trade in other countries (regions).

Name of the country (region)/Enterprise	Importing country	What kind of trade impediments	Time of implementation	The Current Status (In progress/stopped)

67. Please indicate whether the equipment known to the country (region) or the company under investigation produces products that have been inspected, whether other products can be produced or are in the process of producing other products, please provide detailed data to the extent possible.

68. Please describe the export to China of major raw materials, components and semi-finished products from the countries (regions) or companies surveyed during the survey period.

69. Please explain the situation of the countries (regions) or surveyed enterprises exporting upgraded products to China during the survey period.

70. Please indicate whether the country (region) or the company under investigation during the investigation period has exported the products under investigation to China through other countries (regions).

71. At the end of the announcement of the final review case, is there already a substitute product for the product being investigated in China's foreign market? Please elaborate on its use (including end-use and alternative uses that differ from the product being investigated), quantity, degree of substitution and development trends.

72. Between 2020 and the end of March 2024, the overall economic growth of the countries involved, as well as the overall demand for the economy. Whether there are macroeconomic factors that affect the growth (or reduction) of social needs and the increase (or decrease) of total consumption. If so, please elaborate.

73. Please explain the demand and consumption of the products involved in the country (region) between 2020 and the end of March 2024. Whether there are macroeconomic factors that affect the growth (or decrease) of demand for the products involved, increase (or decrease) in consumption costs. If so, please be detailed. Your company believes that other matters need to be further explained.

Part VII Other information to be explained

Your company responds to this section of the contact.

In the department. The job. It's a phone.

74. Ask your company to summarize and evaluate the basic situation of the domestic industry.

75. Describe, on a case-by-case basis, the following factors that may affect the state of the domestic industry, including:

- (1) Changes in China's demand;
- (2) Changes in consumption patterns;
- (3) Changes in China's industrial management;
- (4) Trade-restrictive practices and competition between foreign (outside) and Chinese producers;
- (5) Technological developments;
- (6) China's export status of similar products;
- (7) The quantity and price of imported products not sold at dumping prices;
- (8) Force majeure factor;
- (9) Impact of China's capacity expansion;
- (10) Other.

If anti-dumping measures are eliminated, please predict the changes in the above factors and their possible future impact on the Chinese industry.

76. Please outline the effect of changes in exchange rates on imports of the products under investigation and similar products produced by your company.

77. Please provide a brief description and assessment of the current situation and trends of supply and demand in the global nitrile rubber industry and its market.

78. Please describe the relationship between your company's business,

changes in financial indicators and imports of products under investigation.

79. The general opinions, suggestions, requirements, or other matters that your company believes need to be explained in one step.

80. What are your company's suggestions and suggestions on how to improve this questionnaire?
